

UNIT - 1

1. Explain how cybercafes can be linked to cybercrime. What preventive measures can be taken to reduce cybercrime through cybercafe usage?
2. Explain how cloud computing can be both a target and a tool for cybercriminals.
3. Define the term "attack vector" and give examples of common attack vectors in cybercrime.
4. Explain about Indian perspectives of Cybercrimes?
5. Discuss Cyber Crime and the Indian ITA 2000
6. Define cybercrime. Describe its origins and classifications, providing examples of each classification.
7. Explain the role of ITA 2000 in combating cybercrime in India.
8. Discuss the role of anonymity in enabling cybercrime.
9. What is cyber forensics? Discuss its importance in handling cybercrime cases
10. Describe the concept of the "Cybercrime Era" and explain the idea of the "Survival Mantra for the Netizens."
11. Describe the types of cyber criminals and give examples of each type. Discuss how these types are classified.
12. Explain about legal perspectives of Cybercrimes?
13. Analyze about the Global perspective of Cyber Crime
14. Describe the process of cybercrime investigation.
15. Explain the challenges in prosecuting cybercriminals internationally.
16. Discuss the concept of cyberstalking and its impact on individuals. How can individuals protect themselves from cyberstalking?
17. Explain different types of Cybercrimes and how security will be provided.
18. Who are cyber criminals? Discuss the three groups of Cybercriminals.
19. Discuss the legal perspectives on cybercrime with examples.
20. Describe the process of cybercrime investigation.
21. Define Social Engineering with its types. Describe how social engineering is used in cybercrime.
22. Explain the following terminologies?
 - a. Hacker
 - b. Brute Force Hacking
 - c. Cracker
 - d. Cracker tools
 - e. War dialer
23. Define computer crime. Discuss Cyberpunk and Cyberwarfare.
24. Explain the following
 - a. Cyberspace
 - b. Cyberpunk
 - c. Cyberwarfare
 - d. Cyber squatting
 - e. Cyber terrorism

UNIT -2

1. Discuss the impact of mobile and wireless devices on the rise of cybercrime.
2. Explain common security issues associated with wireless devices.
3. Describe the role of encryption and regular software updates in securing mobile devices.
4. Discuss about Authentication Service Security? Write about Mobile/Cell Phone attacks?
5. Discuss about the Security implications for Organizations? What different Organizational measures for handling Mobile?
6. What are some types of attacks possible on mobile phones? Describe organizational measures to secure mobile devices.
7. Summarize the Proliferation (Growth) of Mobile and Wireless Devices
8. Explain the types of mobile phone Attacks
9. Explain the concept of “Laptops in the Mobile Computing Era”.
- 10.** Explain the potential consequences of a mobile security breach.
11. Explain credit card fraud in the context of mobile and wireless computing. Discuss security challenges related to credit card frauds.
12. Compare Mishing, Smishing and Vishing in detail
13. Discuss the Security Challenges posed by Mobile Devices
14. Discuss the importance of registry settings and authentication services for securing mobile devices.
15. Discuss organizational measures for handling the mobile devices
16. Importance of security policies related to Hand held devices
17. Explain the Proliferation of mobile and wireless devices.
18. Compare Mishing, Smishing and Vishing in detail
19. What are different Security policies on Laptops and Wireless devices? Explain?
20. Explain common types of attacks on Bluetooth technology.
21. Explain trends in Mobility and explain types of attacks on mobile networks.
22. Explain in detail the Authentication Service Security on mobile devices
23. Explain how location services on mobile devices can lead to privacy concerns.
24. Discuss Phishing and Vishing with an example.
25. What are different security challenges posed by mobile devices? Explain?
26. What are different Registry Settings for Mobile Devices? Explain?
27. Explain about the Organizational Security policies for mobile devices? What are different security policies on measures in Mobile devices?
28. What are different Security policies on Laptops and Wireless devices? Explain?
29. Explain about different Cyber Security aspects of Mobile and Wireless Devices?
30. Explain about the Mobility and its Trends?

UNIT -3

1. Define proxy servers and anonymizers. Explain how cybercriminals use these tools to protect their identities.
2. Describe DoS and DDoS attacks, their impact on network security, and the common methods used in such attacks.
3. Explain the process of data exfiltration and the role of ransomware in cybercrime.
4. What is steganography? Discuss its use in cybercrime and how it differs from other forms of data hiding.
5. What is identity theft, and what are the standard methods used? Briefly discuss its impact on victims.
6. Discuss password cracking and its methods
7. Describe SQL injection and its use in cyber-attacks
8. What are botnets, and how are they created?
9. What is keystroke logging? How is it used in cyber-attacks? Describe the different types of spyware used in cybercrime.
10. Discuss ransomware and its impact on organizations. Explain the concept of malware and its different types.
11. What are Trojan Horses and Backdoors? How can you protect yourself from Trojan Horses and backdoors?
12. With example discuss the different stages of attacks through which attacker target the computer system/network.
13. What is the difference between a virus and a worm? List the types of virus
14. and explain.
15. Explain the following
16. Scareware, ii) Malvertising, iii). Clickjacking, iv). Ransomware
17. What are the different components of wireless network?
18. Differentiate between WEP and WPA2?

Unit 4

1. Define computer forensics. Explain the need for computer forensics in the modern digital world.
2. Explain how a computer forensics lab is set up and managed, highlighting the importance of forensic readiness in organizations.
3. Describe the digital evidence lifecycle and explain the significance of the chain of custody.
4. What are anti-forensics techniques, and how do they challenge forensic investigations?
5. With neat diagram explain process model for understanding a seizure and handling of forensics
6. evidence legal framework.
7. Discuss the OSI 7 Layer Model and its relevance in network forensic investigations.
8. Differentiate between Forensics Policy and Security Policy? List various Computer Forensics services available, and explain any two of them.
9. Define Computer Forensics. Briefly explain its challenges.
10. Discuss the precautions to be taken when collecting electronic evidence
11. Describe how data recovery is conducted in forensic labs.
12. How does digital evidence analysis differ from physical evidence analysis?
13. Explain forensics methods for investigating social networking sites.
14. Explain the significance of operating system forensics. Describe the process of imaging and analysis in digital forensics.

Unit 5

1. Discuss intellectual property protection under cyber law and explain copyright and patent laws in the context of digital content.
2. Explain various security policies.
3. Differentiate between Patentable Invention and Nonpatentable Invention.
4. Explain the IPR issues with appropriate laws related to it.
5. Explain the need for an information security policy in organizations and describe the main objectives of the Information Technology Act of 2000.
6. Explain the procedure for obtaining a patent.
7. Discuss Software Licensing.
8. Define Copyright and explain exclusive rights given to authors.
9. Briefly explain IPR in the field of Semiconductor Integrated Circuit Layout Design.
10. Describe the various information security standards (e.g., ISO) and their importance.
11. Define security policy. Discuss the role of security policies in protecting sensitive data.
12. Who can claim Copyright? Which works are protected and unprotected?
13. Describe the legal aspects of data sharing in cloud computing. Discuss the role of digital signatures in secure communications.
